Designer Finishes

Jenson & Nicholson established its presence in India, in the year 1922 and the company is considered India's second oldest paint company. In 2016, Jenson & Nicholson India Limited and Sheenlac collaborated to form the joint venture Jenson & Nicholson Paints Private Limited (JNPL), with the intent to revive the brand and build a viable alternative in the retail Decorative Paint market in India. In 2024, Sheenlac acquired Jenson & Nicholson India Limited paints marking a significant milestone in its growth journey.

Jenson & Nicholson Paints Private Limited (JNPL) embarked on a journey to renew and revamp the brand Jenson & Nicholson in the retail decorative paint market, taking into account the brand's gradually declining presence, owing to challenging circumstances, over the years. Today, team Sheenlac has established its absolute ownership of the brand and it aspires to revive J&N brand and propel it to greater heights!

JNPL has began re-establishing the INSTA COLOR brand which was the pioneer in the tinting of shades and continues to exact high recall in the decorative paint segment, till date. Moreover, the company has introduced many high-quality formulations in the South Indian market that is renowned for being extremely quality conscious. Jenson & Nicholson Paints Private Limited (JNPL) has adopted aggressive and agile R&D efforts to innovate and produce market first products and solutions!

SANDINOVA FINE is a premium water-based interior crafted for interior decoration, offering exclusive luminescent sandy reflections. Its versatility suits both modern and classic decorative styles, elevating any environment with elegance.

JENSON & NICHOHLSON SPECIAL EFFECTS

Transform your living space into an embodiment of your personality and unique taste with JN Special effect designer finishes. It goes beyond being just a home; it's an expression of your persona and indulgences. Witness an unprecedented interplay of materials and patterns, thoughtfully curated for the modern home. The avant-garde yet sophisticated color palette offers a one-of-a-kind blend of classy and contemporary elements, ensuring that JN Special effect designer finishes brings the wow-factor to your living spaces. Tailored for today's homes, the finishes seamlessly integrate with the myriad elements of modern interior decor.

Explore our collection boasting 10 stunning finishes, promising to redefine the essence of luxury decor.

SANDINOVA FINE

SANDINOVA FINE is a premium water-based paint crafted for interior decoration, offering exclusive luminescent sandy reflections. Its versatility suits both modern and classic decorative styles, elevating any environment with elegance. Highly durable and breathable, it withstands washing and can be easily painted over with any other water-based paint, ensuring long-lasting beauty and adaptability to evolving design preferences.

Old surfaces: Remove old peeling or chalking paint and wash using a suitable product. Next, apply a coat of JN Speciality primer diluted 50% with water to act as a fixative. After approximately 4 hours, apply a second coat of JN Speciality primer diluted 20 - 30% with water. However, if the surfaces are sound and not chalking, apply a single coat of JN Speciality Primer diluted 20 - 30% with water.

New surfaces: Use a suitable filler to repair the surface where necessary. When dry, sand the surface and apply a coat of JN Speciality primer diluted 15 - 20% with water.

APPLICATION: Brushstroke Effect

1. JN Speciality Primer

2. Sandinova Fine

Tools Required:

Roller

Brush

Brushstroke Effect: Apply Sandinova Fine using the Brush and work in all directions. Allow to dry for about 2 hours, then apply a second coat using the same technique.

Streaked Effect: Apply Sandinova Fine using the Roller and work in all directions; on the last stroke, move in a vertical direction from top to bottom. Go over the product while it is still wet using the brushed Spatula, moving from top to bottom and vice-versa to leave streaks which are as straight as possible. Allow to dry for about 2 hours, then apply a second coat using the same Roller and Spatula techniques.

Dilution details:

JN Speciality primer - 15 to 20% with water
Sandinova Fine - Ready to use

Coverage:

JN Speciality primer - 80 to 120 Sq. ft. per Ltr for one coat
Sandinova Fine - 90 to 100 Sq. ft. per Ltr for Brushstroke effect and
- 80 to 90 Sq. ft. per Ltr for Streaked effect
(it may vary depending on roughness, porosity, absorption surface and application method)

NOTE: Mix well before use, wash the tools with water, immediately after using, with water and soap.
